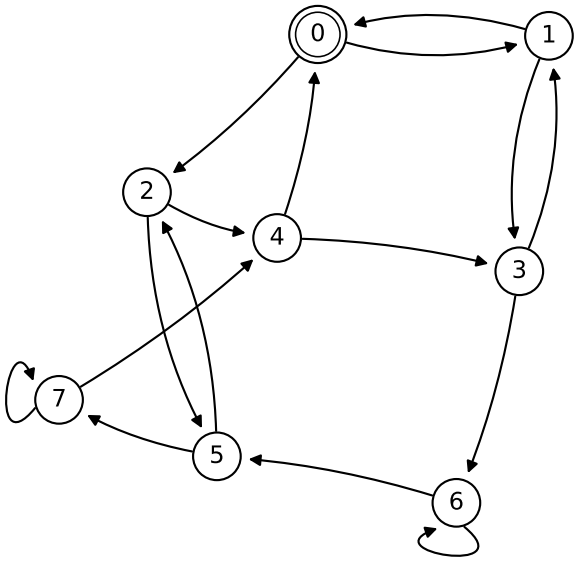
Eight-state estimated leader

Verified upper bound H ≤ 50; shortestness unproved

Working estimate 49 (historical conjecture)



Marked start(s): 0; all arrows unlabelled and solid.

The pair below is verified for representative start 0 on all 256 static masks.

u = 000011011010101010110001111000000110100100111000 10

v = 001000110110101010110001111000000110100100111000 10

k=unknown; common-suffix-historical

Separate refinement: completed common-suffix k=10,12; attempted k=16 (incomplete).

D(i) counts different endpoints; D(empty)=0. Agreement can later be lost.
